Section I: Developmental and Degenerative Disorders

1. Functional Anatomy and Biomechanics of the Hand	3
2. Examination of the Upper Extremity	37
3. Imaging of the Hand and Wrist	51
4. Clinical Neurophysiology in the Upper Limb	71
5. Congenital Hand Differences	89
6. Entrapment Neuropathies of Upper Limb	169
7. Upper Limb in Cerebral Palsy	201
8. Vascular Anomalies of the Upper Limb	233
9. Ischemic Conditions of Hand	253
10. Infections of the Hand	271
11. Tumors of the Upper Limb	297
12. Dupuytren's Disease	319
13. Surgery of the Wrist and Hand in Rheumatoid Arthritis	341
14. Hand and Wrist Arthroscopy	361
15. Distraction Lengthening for Hand Reconstruction	389

Section II: Trauma

16. General Principles in the Management of Hand Injuries	405
17. Principles and Practice of Microsurgery	415
18. Fingertip Reconstruction	433
19. Thumb Reconstruction	457
20. Soft Tissue Coverage of the Upper Limb	493

21.	Flexor Tendon Repair and Reconstruction	513
22.	Extensor Tendon Injuries	535
23.	Fractures of the Hand	553
24.	Peripheral Nerve Injury and Nerve Transfers in the Upper Limb	575
25.	Tendon Transfers in Upper Extremity	605
26.	Mutilating Hand Injuries	625
27.	Finger Stiffness	639
28.	Replantation and Revascularization	653
29.	Birth Brachial Plexus Palsy	665
30.	Adult Brachial Plexus Injuries	697
31.	Physiotherapy and Occupational Therapy of Hand	715
32.	Upper Limb Amputations and Protheses	737
