Foreword	iv	Sleep Problems	41
Preface to the First Edition	v	Teeth Grinding	43
Preface to the Second Edition	vi	Rocking and Head Banging	43
<b>1. Introduction to Pediatrics</b>	<b>1</b>	Bed-Wetting	43
Goal of Child Care	1	Fiddling with the Genitals	44
Age Groups in Children	2	<b>6. Teething and Oral Health</b>	<b>45</b>
Maternal Health and Child Survival	3	Dentition	45
Interaction between Nature and Nurture	3	Milk Teeth	45
Importance of Nutrition	3	Permanent Teeth	45
Doctor–Patient Relationship	4	Common Symptoms because of Teething	46
Art of Pediatrics	4	Care during Teething	46
Management Strategies	4	Brownish Staining of Teeth	46
Holistic Care	5	Care of Permanent Teeth	47
Ethical Concerns	5	Caries and Cavities	48
Art of Communication	6	Malocclusion of Teeth	48
Salient Vital Statistics	6	Avulsion of Tooth	48
Strategies for Child Survival	7	Fluorosis	48
Hospital Care of Sick Children	7	<b>7. Fluid and Electrolyte Disorders</b>	<b>50</b>
<b>2. Growth and Development</b>	<b>10</b>	Maintenance Requirements of Water and Electrolytes	51
Growth of Various Body Systems and Organs	10	Development of Disorders of Fluids and Electrolytes	51
Physical Growth	10	Electrolyte Disturbances	54
Brain Growth	13	Acid–Base Disorders	56
Process of Development	14	Fluid Therapy in Special Situations	57
Delayed Speech	20	<b>8. Feeding and Nutrition</b>	<b>60</b>
Developmental Delay	21	Breastfeeding	60
Correlates of Cognition	22	Breastfeeding and Brain Growth	61
Gifted Child	23	Preparation for Breastfeeding	61
<b>3. Health Problems and Concerns during Adolescence</b>	<b>26</b>	Assessment of Adequacy of Lactation	64
Physical Growth	26	Medicines to be Avoided by the Nursing Mother	65
Bone Growth	26	Rearing of Twins on Breastfeeding	65
Diet during Adolescence	26	Diet during Lactation	65
Sexual Maturation	27	Foods to be Avoided during Nursing	66
Emotional and Psychological Changes	28	Breastfeeding by a Working Mother	66
Common Health Problems	29	Technique for Expression of Breast Milk	66
Vaccinations	29	Storing Expressed Breast Milk	67
School Health Program	30	Common Problems during Breastfeeding	67
<b>4. Development of Behavior and Personality</b>	<b>33</b>	Common Myths and Realities Regarding Breastfeeding	68
Role of Parents	33	Maternal Nutrition and Child Health	70
Television and Behavior	36	Bottle Feeding	71
<b>5. Common Developmental Disorders</b>	<b>38</b>	Feeding with a Cup and Spoon or <i>Paladay</i>	74
Temper Tantrums	38	Hazards and Benefits of Bottle Feeding	74
Breath-Holding Spells	38	Feeding with Solids	75
Finger- and Thumb-Sucking	39	Criteria for Adequate Feeding	78
Nail-Biting	39	Fussy or Finicky Eater	78
Pica	40	Balanced Diet	80
Tics	40	Docosahexaenoic acid in the Diet	82
Speech Problems	40	Missing the Breakfast	82

Hazards of Junk Food	82	Weight Record	162
Vegetarian versus Non-Vegetarian Diet	83	Immunizations	162
Minerals and Vitamins	83		
Preserving Nutrients during Cooking	85	<b>19. Common Neonatal Problems</b>	<b>166</b>
Traditional Beliefs	85	Regurgitation of Feeds and Vomiting	166
<b>9. Nutritional Disorders</b>	<b>90</b>	Bowel Disorders	166
Children Are at an Increased Risk of		Delayed Passage of Urine	167
Developing Nutritional Disorders	90	Physiological Jaundice	167
Epidemic of Hidden Hunger	90	Jitteriness	167
Isolated Micronutrient Deficiencies	91	Superficial Infections	167
Protein–Energy Malnutrition	96	Dehydration Fever	168
Marasmus	97	Excessive Crying	168
Kwashiorkor	98	Excessive Sleepiness	168
Obesity	98	Cephalhematoma	168
<b>10. The Child with Failure to Thrive</b>	<b>104</b>	Cradle Cap	168
<b>11. The Child with Short Stature</b>	<b>107</b>	Umbilical Granuloma	169
<b>12. Chromosomal and Genetic Disorders</b>	<b>111</b>	Napkin Rash (Diaper Rash)	169
Chromosomes and Genes	111	Sneezing	169
Chromosomal Disorders	113	Hiccups	169
Genetic Disorders	115	Yawning	169
Prevention of Genetic Disorders	118	Disorders because of Transplacental	
General Management	119	Passage of Hormones	169
Common Inborn Errors of Metabolism	120	Minor Developmental Peculiarities	169
Genetic Counseling	125	<b>20. Disorders of Weight and Gestation</b>	<b>175</b>
<b>13. Introduction to the Care of Newborns</b>	<b>129</b>	Low Birth Weight Babies	175
Challenge and Constraints	129	Preterm Neonates	175
Essential Newborn Care	129	Small-For-Dates Babies	181
Neonatal Morbidity	129	Large-for-Dates Babies	183
Levels of Newborn Care	131	Infants of Diabetic Mothers	184
Nomenclature and Definitions	132	<b>21. Feeding of Preterm and Low Birth</b>	
Millennium Development Goals and Targets	134	<b>Weight Babies</b>	<b>187</b>
<b>14. Resuscitation of an Asphyxiated Newborn</b>	<b>138</b>	Fluids and Caloric Needs	187
Fetal Hypoxia	138	<b>22. Common Diseases of the Newborns</b>	<b>190</b>
Assessment of the Infant at Birth	139	Respiratory Distress Syndrome	190
Resuscitation Kit	139	Neonatal Jaundice	194
Care of a Meconium-Stained Baby	139	Hemolytic Disease of the Newborn	195
Bag and Mask Ventilation	141	Persistent Jaundice in a Newborn	198
External Cardiac Massage and Medications	142	Perinatal Infections	201
Postresuscitation Management	143	Intrauterine Infections	201
<b>15. Humanized Care of Newborns</b>	<b>147</b>	Septicemia	203
<b>16. Temperature Regulation</b>	<b>150</b>	Prevention of Nosocomial Infections	205
Mechanisms of Heat Loss	150	Metabolic Disorders	211
Clinical Manifestations of Hypothermia	150	Transport of a Sick Neonate	214
<b>17. Birth Injuries</b>	<b>155</b>	<b>23. Physiologic Basis of Fever and Its</b>	
Superficial Injuries	155	<b>Supportive Management</b>	<b>216</b>
Fractures of Bones	155	<b>24. Aches and Pains</b>	<b>222</b>
Peripheral Nerve Injuries	155	Assessment of Severity of Pain	222
Birth Trauma to Central Nervous System	157	Mechanism of Pain	222
<b>18. Care of Normal Birth Weight Neonates</b>	<b>158</b>	Abdominal Pain	223
Care at Birth	158	Body Aches	226
High-Risk Neonate	159	Choice of Analgesics	227
Breastfeeding	159	Pain of Procedures	228
Maintenance of Body Temperature	159	<b>25. Fever of Acute Onset and Short Duration</b>	<b>233</b>
Care of the Umbilical Stump	162	Heatstroke	241
		<b>26. Fever without Focus and Fever</b>	
		<b>of Unknown Origin</b>	<b>242</b>

<b>27. Immunity and Allergy</b>	<b>248</b>	Gastroesophageal Reflux Disease	344
Immune Defense Mechanisms	248	Hypertrophic Pyloric Stenosis	344
Correlates of Immune Deficiency Disorders	250	Constipation	348
Allergy	251	Hirschsprung Disease	349
<b>28. Immunizations</b>	<b>254</b>	Viral Hepatitis	349
Active and Passive Immunity	254	Wilson Disease	352
Types of Vaccines	254	Portal Hypertension	353
Vaccination Schedule	255	Acute Liver Failure	354
Newer Vaccines	257	<b>36. Respiratory System Disorders</b>	<b>360</b>
Common Side Effects of Vaccines	260	Pneumonia	360
<b>29. Common Infectious Diseases</b>	<b>266</b>	Empyema Thoracis	361
Modes of Spread of Infections	266	Acute Bronchiolitis	362
Exanthematous Illnesses	266	Bronchial Asthma	364
Typhoid and Paratyphoid Fever	274	<b>37. Cardiovascular System Disorders</b>	<b>375</b>
Tetanus	276	Acute Rheumatic Fever	375
Rabies	278	Rheumatic Heart Disease	378
<b>30. Tuberculosis</b>	<b>281</b>	Heart Failure	379
Pulmonary Tuberculosis	282	Common Congenital Heart Diseases	384
Extrapulmonary Tuberculosis	283	Pericarditis	390
Drug Regimens	286	Infective Endocarditis	391
Multidrug Resistant Tuberculosis	286	Cardiac Arrhythmias	392
<b>31. Mosquito-Borne Diseases</b>	<b>291</b>	Hypertension	394
Malaria	291	<b>38. Genitourinary Disorders</b>	<b>400</b>
Dengue Fever	296	Urinary Tract Infections	400
Chikungunya	300	Acute Glomerulonephritis	402
Japanese Encephalitis	302	Nephrotic Syndrome	402
Filariasis	302	Hematuria	405
Control of Mosquito-Borne Diseases	303	Non-Retractable Foreskin	406
<b>32. Acquired Immunodeficiency Syndrome</b>	<b>305</b>	Undescended Testis	406
<b>33. Helminthic and Protozoal Diseases</b>	<b>311</b>	Ectopia Vesicae	406
Life Cycle of Parasite	311	Acute Kidney Injury	407
Pinworms	311	Peritoneal Dialysis	408
Roundworms	312	<b>39. Hemato-Oncologic Disorders</b>	<b>413</b>
Hookworms	312	Child with Anemia	413
Tape Worms	312	Nutritional Anemias	415
Giardiasis	313	Iron Deficiency Anemia	415
Amebiasis	313	Megaloblastic Anemia	416
Visceral Leishmaniasis ( <i>Kala Azar</i> )	314	Thalassemias	418
<b>34. Diseases of Ear, Nose, and Throat</b>	<b>319</b>	Aplastic Anemia	420
Developmental Aspects	319	Bleeding Disorders	421
Common Cold	319	Disseminated Intravascular Coagulation	421
Acute Tonsillitis	321	Idiopathic Thrombocytopenic Purpura	422
Acute Otitis Media	323	Hemophilia	423
Croup	325	Leukemias	426
Acute Spasmodic Laryngitis	325	Lymphomas	430
Epiglottitis	325	Solid Tumors	431
Diphtheria	326	<b>40. Central Nervous System Disorders</b>	<b>435</b>
Pertussis	327	Neonatal Seizures	435
Epistaxis	328	Febrile Seizures	436
<b>35. Gastrointestinal and Liver Disorders</b>	<b>333</b>	Epilepsy	438
Acute Diarrhea and Dysentery	333	Status Epilepticus	443
Cholera	338	Pyogenic Meningitis	447
Persistent Diarrhea	339	Tuberculous Meningitis	450
Celiac Disease	340	Encephalitis and Encephalopathies	451
Vomiting	343	Intracranial Space-Occupying Lesions	453
		Child with Coma	455

Acute Flaccid Paralysis	458	Integrated Child Development Services Program	536
Guillain-Barre Syndrome	458	Expanded Program of Immunizations	537
Acute Paralytic Poliomyelitis	459	Child Survival and Safe Motherhood Program	537
Acute Flaccid Paralysis Surveillance	460	Reproductive and Child Health Program	537
Muscular Dystrophies	461	Integrated Management of Neonatal and Childhood Illnesses	538
<b>41. Child with a Handicap</b>	<b>468</b>	National Rural Health Mission	539
Types of Handicaps	468	<i>Janani Suraksha Yojana</i>	540
Prevention of Handicaps	468	<i>Janani-Shishu Suraksha Karyakaram</i>	540
Cerebral Palsy	469	<b>47. Common Pediatric Routines and Procedures</b>	<b>542</b>
Mental Retardation	471	General Guidelines	542
Child with a Learning Disability	472	Vital Signs	542
Dyslexia	473	Intake–Output Charting	543
Attention Deficit Hyperactivity Disorder	473	Anthropometry	543
Autism Spectrum Disorders	474	Body Holds and Restraints	545
<b>42. Connective Tissue Disorders</b>	<b>477</b>	Collection of Laboratory Samples	546
Arthralgias and Arthritis	477	Exchange Blood Transfusion	554
Juvenile Rheumatoid Arthritis	478	Injections	554
Systemic Lupus Erythematosus	481	Enteral Feeding and Procedures	555
Kawasaki Disease	483	Enemas	557
Henoch-Schonlein Purpura	484	Suctioning	558
<b>43. Disorders of Endocrine Glands</b>	<b>487</b>	Chest Physiotherapy	559
Diabetes Mellitus	487	Oxygen Saturation Monitoring	559
Diabetic Ketoacidosis	490	Radiant Warmer	559
Diabetes Insipidus	491	Incubator Care	560
Hypothyroidism	491	Lumbar Puncture	561
Goiter	493	Subdural Tap	561
Hyperthyroidism	494	Ventricular Tap	562
Disorders of Parathyroid Glands	494	Bone Marrow Aspiration	562
Precocious Puberty	495	Liver Biopsy	562
Delayed Puberty	497	Kidney Biopsy	563
Undescended Testis	498	Fine-Needle Aspiration Cytology	563
Ambiguous Genitals	498	Thoracocentesis	563
Disorders of Adrenocortical Biosynthesis	499	Pericardiocentesis	564
Congenital Adrenal Hyperplasia	499	Abdominal Paracentesis	564
<b>44. Accidents, Poisonings, and Animal Bites</b>	<b>505</b>	Peritoneal Dialysis	564
Burns and Scalds	505	<b>48. Medications and Supportive Care</b>	<b>566</b>
Falls, Bumps, and Bruises	507	Essential and Safe Medicines	566
Head Injury	507	Oral Medications	566
Drowning	508	Rectal Medications	567
Foreign Bodies, Choking, and Suffocation	509	Parenteral Medications	567
Accidental Poisoning	511	Topical Medications	567
Kerosene Poisoning	512	Medications Directly into the Lungs	568
Organophosphate Poisoning	512	Humidification	569
Animal and Insect Bites	514	Oxygen Therapy	569
<b>45. Cardiopulmonary Resuscitation</b>	<b>519</b>	Phototherapy	570
Pediatric Basic Life Support	519	Blood Transfusion	571
Pediatric Advanced life Support	522	Emergency Trolley	572
Shock	524	Dosages of Commonly Used Drugs	572
<b>46. Social and Community Pediatrics</b>	<b>531</b>	Appendices	577
Traditional Health Care Practices for Child Rearing	531	Index	595
