European Journal of Pediatric Surgery

ISSN: 0939-7248
Volume: 33
Issues Per Year: 6

Editor-In-Chief(s):

B. M. Ure

This broad-based international journal updates you on vital developments in pediatric surgery through original articles, abstracts of the literature, and meeting announcements.

You will find state-of-the-art information on:

- Abdominal and thoracic surgery
- Neurosurgery
- Urology
- Gynecology
- Oncology
- Orthopaedics
- Traumatology
- Anesthesiology
- Child pathology
- Embryology
- Morphology

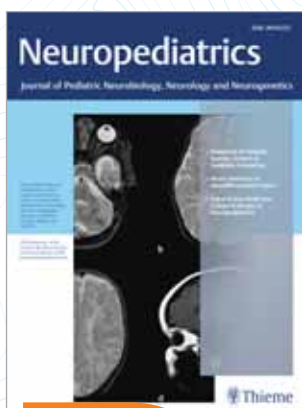

Abstracting and Indexing:

MEDLINE, Current Contents, Science Citation Index, EMBASE/Excerpta Medica, SCOPUS, Journal Citation Reports, Emerging Sources Citation Index (ESCI), Web of Science, EBSCO, ProQuest

Neuropediatrics

Journal of Pediatric Neurobiology, Neurology and Neurogenetics

ISSN: 0174-304X
Volume: 54
Issues Per Year: 6

Editor-In-Chief(s):

I. Borggräfe, Munich

For key insights into today's practice of pediatric neurology, Neuropediatrics is the worldwide journal of choice. Original articles, case reports and panel discussions are the distinctive features of a journal that always keeps abreast of current developments and trends - the reason it has developed into an internationally recognized forum for specialists throughout the world.

Pediatricians, neurologists, neurosurgeons, and neurobiologists will find it essential reading.

Good reasons to subscribe:

1. Up-to-date information on cutting edge topics
2. Developments, techniques and topical research
3. Rigorous, independent peer-reviewing system
4. International and esteemed Editorial Board
5. Free online access to the journal with individual subscriptions

American Journal of Perinatology

Maternal-Fetal and Neonatal Medicine

Editor-In-Chief(s):

Rosemary D. Higgins, George R. Saade

ISSN: 0735-1631

Volume: 40

Issues Per Year: 16

The American Journal of Perinatology is an international, peer-reviewed, and indexed journal publishing 16 issues a year dealing with original research and topical reviews. It is the definitive forum for specialists in obstetrics, neonatology, perinatology, and maternal/fetal medicine, with emphasis on bridging the different fields.

Abstracting and Indexing:

Journal Citation Reports (JCR), Biological Abstracts, BIOSIS, CINAHL, Current Contents/Clinical Medicine, EMBASE, Excerpta Medica, Index Medicus, ISI/BIOMED, MEDLINE, Reference Update, Research Alert, Science Citation Index, Scopus, Scisearch, EBSCO, ProQuest

Journal of Pediatric Infectious Diseases

Official Journal of the World Society of Child Science

Editor-In-Chief(s):

Michael H. Kohrman

ISSN: 1305-7707

Volume: 18

Issues Per Year: 6

The Journal of Pediatric Epilepsy is an English multidisciplinary peer-reviewed international journal publishing articles on all topics related to epilepsy and seizure disorders, epilepsy surgery, neurology, neurosurgery, and neuropsychology in childhood. These topics include the basic sciences related to the condition itself, the differential diagnosis, natural history, and epidemiology of seizures, and the investigation and practical management of epilepsy (including drug treatment, neurosurgery and non-medical and behavioral treatments). Use of model organisms and in vitro techniques relevant to epilepsy are also acceptable. Journal of Pediatric Epilepsy provides an in-depth update on new subjects and current comprehensive coverage of the latest techniques used in the diagnosis and treatment of childhood epilepsy.

Paediatric Emergency Medication Book: India

Indumathy Santhanam
Nicole Dirnbauer
Simon Craig

Edition: 1st | Year: 2022 | Pages: 110

Illustrations: 50 | Price: ₹ 1,995

DESCRIPTION

Paediatric Emergency Medication Book: India provides a practical, pragmatic guide to one of the most stressful clinical encounters, that is, the resuscitation of a critically ill infant or child. Medication safety during paediatric resuscitation is vitally important. Time pressures of emergency treatment can lead to errors in drug calculation, drawing up, dilution, or administration. Such errors can be catastrophic, potentially leading to worsening shock, cardiac arrest, or even death.

This book, based on a successful model developed at Monash Children's Hospital, Australia, and building on years of clinical experience in one of the busiest paediatric emergency departments in the world (Institute of Child Health, Chennai), is designed to improve safety during the resuscitation of critically ill children.

KEY FEATURES

- Pre-calculated, weight-based doses in resuscitation situations (cardiac arrest, intubation, seizures, shock, electrolyte abnormalities, and anaphylaxis)
- Age-appropriate endotracheal tube size and positioning
- Established Advanced Paediatric Life Support (APLS) and Paediatric Resuscitation and Emergency Medicine (PREM) guidelines are presented for a number of critical conditions, including asthma, dengue, snake bite, seizures, septic shock, and respiratory distress.
- Information is provided in a user-friendly and colour-coded layout. Tables and highlighting provide easy access to medication doses, appropriate dilution, infusions rates, and volumes to be administered.
- The book is spiral-bound, durable, and specifically designed for use in clinical settings such as on a resuscitation trolley, in theatre, in the emergency department, or intensive care.
