Edition : 1

Year : 2004

Illustrations : 31

Pages : 432.00

ISBN : 9781588901712

Price : \$100.00

Description

Practical and easy-to-read, this point-of-care reference provides a succinct, clinical overview of eye anatomy, disease, and treatment. Unlike many ophthalmic handbooks, OPHTHO NOTES classifies disease based upon etiology, rather than presenting signs and symptoms. This classification helps to compartmentalize diseases of the eye, and ensures quick and effortless reference.

Outstanding features:

- Comprehensive -Thorough coverage of the entire field of ophthalmology
- Practical - More than 1,000 mnemonics, anagrams, and other memory aids, particularly valuable to residents and fellows
- State-of-the-art - Incorporates the latest genetic disease discoveries, refractive surgery techniques, summaries of recent major clinical trials, and more
- Unique - Special chapter on medications, covering everything from antibacterials and corticosteroids, to miotics, mydriatics, neurologic medications, and immunosuppressives

Concise for a quick, point-of-care use during rounds, yet in-depth enough to review the entire field, this book is an essential and reliable resource for residents in ophthalmology, the perfect refresher for practicing ophthalmologists and optometrists, and a practical reference for all primary healthcare providers.
