Description

Dealing with bronchial asthma, hay fever or neurodermatitis often dramatically reduces a patient's quality of life. The success rate for chemical suppression or hyposensitization treatments is unsatisfactory. In addition, there are increased numbers of side effects and dangers.

Using many years of well-documented, successfully treated case histories and his experience gained in private pediatric practice, the author is able to demonstrate that allergies can be healed completely when they are recognized as a biophysical phenomenon and treated according to the laws of biophysics.

Based on the substantive concept of "bioresonance therapy," this book elaborates extensively and systematically on the foundation and practice of the biophysical "elimination" of allergies - that is to say, without chemicals or the stress resultant from side effects, particularly noted in pediatrics. Recognizing and Eliminating Allergies Using Biophysical Means
