Description

Pediatric Otorhinology: Diagnosis and Treatment addresses the medical and surgical treatment of the most common and challenging clinical conditions in the rapidly growing field of pediatric otorhinology. Clear, concise chapters distill a significant amount of information that the pediatric subspecialist will find useful to reference in daily practice. Residents will also find this text valuable as a guide during pediatric otorhinology rotations.

Key Features:

- ▶ Includes information on evidence-based management of pediatric sinusitis and otitis media
- ▶ Covers contemporary trends in the evaluation of sensorineural hearing loss and cochlear implantation
- ▶ Provides a current review of airway evaluation and reconstruction

The contributors to this volume are recognized experts in pediatric otorhinology and have presented clinical information, new insights on differential diagnosis, and the latest diagnostic methods and treatment modalities in a format that is accessible to residents, clinicians, and specialists who treat pediatric patients.
