

ER Radiology: Trauma Trainer DVD

Author : Ackermann, Ruchholtz, Siemann, Barkhausen

Edition : 1

Year : 2008

ISBN : 9783131454416

Price : \$100.00

Description

This user-friendly DVD-ROM is a remarkable learning tool for orthopaedists, radiologists, and trainees, and clinicians involved in diagnosing trauma in the emergency room. With over 1,600 radiographs, the program opens by covering the most important skeletal landmarks in normal x-rays. It then presents the most important pathologic findings in a training format.

The main feature of this DVD-ROM is a simulation of the diagnostic process at the light box. The simulation provides hundreds of cases that challenge the viewer to either determine that the image is normal or that it in fact shows signs of trauma. The program provides valuable feedback on responses.

System requirements:

PC with Pentium-compatible processor 650 Mhz (1.5 GHz recommended) 128 MB RAM (512 MB recommended) 32-bit graphics (True-color) resolution 1024x768 pixels (1280x1024 recommended) 10MB free hard disc storage space (3GB for full installation)

DVD drive mouse

Windows 98/ME/2000/XP/Vista/Windows 7. Internet connection recommended.
