The *Journal of Pediatric Epilepsy* is an English multidisciplinary peer-reviewed international journal publishing articles on all topics related to epilepsy and seizure disorders, epilepsy surgery, neurology, neurosurgery, and neuropsychology in childhood. These topics include the basic sciences related to the condition itself, the differential diagnosis, natural history, and epidemiology of seizures, and the investigation and practical management of epilepsy (including drug treatment, neurosurgery and non-medical and behavioral treatments). Use of model organisms and in vitro techniques relevant to epilepsy are also acceptable. *Journal of Pediatric Epilepsy* provides an in-depth update on new subjects and current comprehensive coverage of the latest techniques used in the diagnosis and treatment of childhood epilepsy.

Journal of Pediatric Epilepsy encourages submissions from all authors throughout the world. The following articles will be considered for publication: editorials, original and review articles, short report, rapid communications, case reports, letters to the editor, and book reviews. *Journal of Pediatric Epilepsy* has fast turnaround times with less than two weeks to first decision on average. The journal also offers free proofreading services.

The aim of the journal is to share and disseminate knowledge between all disciplines in the field of epilepsy in childhood. This journal is a publication of the World Pediatric Society: <http://www.worldpediatricsociety.org/>

The *Journal of Pediatric Epilepsy* is available in print and online. Articles published ahead of print are available via the eFirst service on the [Thieme E-Journals](#) platform.
