

Planta Medica

Journal of Medicinal Plant and Natural Product Research

Volume : 89

Year : 2023

ISSN : 0032-0943

Description

All institutional subscriptions to *Planta Medica* include online access.

For **institutional subscriptions**, please contact Institutional Sales for pricing at:

- In US, Canada, South and Central America, please contact esales@thieme.com.
- In Europe, Asia, Africa and Australia, please contact eproducts@thieme.de.

IMPACT FACTOR 2020: 3.352

Please read our complete Terms of Trade for journal **subscription policies**.

Journal subscribers will receive a separate invoice and confirmation for your subscription order with taxes broken down separately as applicable and appropriate for your region.

Special rates are available for members of the Society for Medicinal Plant Research. Please contact aboservice@thieme.de for further information.

Planta Medica is one of the leading international journals in the research area of natural products of any origin – from characterized multi-compound mixtures to defined natural products. *Planta Medica* accepts original research papers and reviews with a strong emphasis on originality and scientific quality.

The following areas of research are covered:

- Experimental, preclinical and clinical pharmacology as well as toxicology
- Biological activities, chemical ecology, chemical biology of natural products
- Natural product chemistry and analytical studies

- Medicinal plant research
- Drug discovery in silico approaches in natural product research

The journal explicitly encourages the submission of chemically characterized abstracts.

Thieme Award 2021 for the Most Innovative Planta Medica Original Paper

Ever since 2013, Thieme awards every year the most promising paper published in *Planta Medica* in the previous year. The decision of the jury - the Editors of the journal - is strictly based on scientific quality and on the interest that the paper has met with in the scientific community. The prize money is EUR 1.500. This year, a paper by Lorena Carla Vieira et al, “

Rosmarinic Acid Intravitreal Implants: A New Therapeutic Approach for Ocular Neovascularization’. Congratulations! [Click here to read the paper for free.](#)

Always wanted to publish in *Planta Medica*? Click below for a video with tips and tricks for a successful submission by Editor-in-Chief Professor Oliver Kayser:

Contributions reporting the following are not normally considered for publication and will be immediately rejected if:

- The manuscript does not fall into any of the above areas
- Activity data are reported without comparison to a recognized positive control
- Plant extracts have not been characterized by analysis of their major constituents (e.g. HPLC, GC, NMR)
- Predictable bioactivity is reported (e.g. antioxidant properties of phenolic compounds)
