Indographics is a peer-reviewed, open-access publication of the Indian Radiological and Imaging Association (IRIA). Established in 2022, the journal is a peer-reviewed bi-annual journal that publishes reviews, pictorial reviews, quality improvement reports, invited commentaries, and letters to the editor in English Language. The manuscripts can be in any of the subspecialties of Diagnostic and Interventional Radiology. The journal is published in both in print (chargeable) and online, with articles appearing online as they are accepted. The journal will be of interest to radiologists, clinicians with an interest in imaging and interventional procedures, researchers, and residents. The articles in the journal will be a good resource for continuing medical education and understanding newer concepts in disease management & treatment.

The journal, being supported by the IRIA, does not charge for submission, processing, or publication of papers. The journal is committed to providing quick and authoritative decisions to the authors.

Scope of the Journal:

The journal will provide a complete update on all imaging subspecialties, interventional radiological procedures, physics, and clinical applications of imaging techniques, including digital radiography, ultrasonography, computed tomography, radionuclide, optical imaging, and magnetic resonance imaging. The journal will accept review articles on the use of artificial intelligence in medical imaging, picture archival and communication system, and post-processing methods used in medical imaging.
